My illusion

Last week, I went to a great salon to see an amazing magic show in Aguadulce (Seville).

The salon was very big and the trick show too. My favourite trick was the last. In this trick, the "magician" made a big truck disappear. All the people in the salon were very surprised. The "magician" put the curtain and we didn't see the truck and when he took the curtain off, the truck wasn't there! The trick was the best that I saw, but the trick wasn't real, it was an optical illusion! Only I knew his secret. The trick was in a big scuttle that was on the floor of the stage. I knew it because I saw the truck through a very little hole on the stage.

When all the people were leaving the salon, I spoke with the "magician" and I told him his secret. He was very embarrassed and I left the salon laughing. 😊

My favorite magic trick.

It was last summer in Barcelona. I went to a circus with my family and I saw a place inside it, with an interesting poster: "My body is cut".

At first, I was a bit indifferent because I don't believe in magic, however, I decided to enter and see the show. When I was there, I saw a magician and a big and rectangular box next to him. When all the stairs were occupied by the audience, he began to shout and I must admit that he scared me. He said that he needed a person and my cousin was the only volunteer.

They went out for some minutes and then, they appeared together on the stage. My cousin was introduced in the box which had some circles on it, and when the music began, the magician cut the box into three different parts and he moved that but my cousin wasn't there! I thought that after that, the trick was finished but suddenly, I saw that on the circles of the box my cousin's hands, legs and head appeared! It was incredible!

When the show finished, I asked my cousin and he didn't tell me anything! He only said say that magic exists. From that day on, I try to understand all the tricks that I see and I'm trying to learn some of these.

AN ILLUSION

◦ WHERE YOU SAW THE ILLUSION: I saw that illusion on the computer.

◦ THINGS USED IN THE TRICK: It's a photo with a black background and a white form above.

◦ WHAT YOU SAW: I saw a man's face.

Last month, I was on the computer in Twitter and I saw a photo that calls my attention. The instructions were that I had to look with attention at four points that were in the middle of a man's face. I looked at them and waited for thirty seconds and then I had to look at the sky and open and close the eyes very quickly. I couldn't believe it! I were seeing Jesuschrist's face in the sky. I was very surprised, I thought it was impossible and I did the process again but the result was the same.

Finally, I looked at the picture and I understood everything. It was an optical illusion.

Illusion

In 2009, I went to a campsite in Coronel. We were all very excited about what would happen in that camp.

Every night we had many games and we had fun a lot but one of those days we were surprised with a magic trick. That trick was the best I've seen in my life.

We all stood in front of a table where our teacher was, and he asked us to write down on paper a sentence important. Then, we folded the paper and gave it to him. It was amazing when our teacher could guess what was in the paper only by touching it.

We were very shocked and we didn't think anything then we went back to write something more difficult and he guessed too.

This magic trick was fantastic and I couldn't guess it.

I couldn't believe what I had seen and it was great. The teacher was a magician and it was the best campsite. I would like to return.

Our mind can do any thing

Two years ago, I lived an unforgettable experience. I left Aguadulce to Coronil on the 22nd of July, with my friends. We had signed up for a campsite.

Those days there were great. A night, at night at the campsite, was the night of magic. Several monitors were making tricks. Those tricks, a trick was the best.

At ~~the~~ first, he explained that he had powers of mind. After that he explained that he could bend or break any thing.

The monitor picked a spoon up, he was watching and in a few seconds, he folded the spoon.

All were surprised, but the best of the night was the last trick; he grabbed a phone book with many pages and he broke the phone book.

The monitors, my friends and me were surprised.

Then, we asked him how, he had done that and He said: "Our mind can do any thing"

A magic rabbit

Five years ago, when I was 11 years old, I went to a shop of magic, in this shop, there were a lot of things of magic.

The shop assistant had a black and yellow cylinder, he introduced his hand into the cylinder and took out a rabbit, when he took the rabbit, I didn't believe it was true.

I went and asked him how the trick was made and he replied: "A good magician doesn't reveal his tricks".

I came out of the magic shop annoyed and my father told me that the rabbit was already hidden in the cylinder.

Cirque du Soleil

Last Saturday I went to see the Cirque du Soleil. It's my favourite show. I couldn't believe it, persons doing backflips. Other persons swallowing swords... It is fantastic!

One of the things that most impressed me, was the acting of two aerialists. The aerialists were very strong men. They performed an inverted balancing trick. They used their hand to hold each other while they were moving in the trapeze. The man that was next to me was exhausted, like me.

After, A magician chose a person in the public. He chose a blonde woman. That woman sat on a chair. The magician concentrated on the chair, and the woman started flying. This trick was incredible it could be a optical illusion.

The actup that I really liked the most was the clow's trick. They enter in the stage in a very small car. First came out one clow, then came out two clows and finally came out ten clows.

I was a very small car and was imposible that thirteen clows came out of that small ~~new~~ narrow car.

In the future I would like to be a clow, because this trick impressed me. And I would like to work in Cirque du Soleil too. /

I really recomended this show!

Last ~~Saturday~~, my family and I went to a ^{Op Art} gallery ~~of~~ (Optical art) at Seville's museum. My favourite picture was the third.

This picture caught my attention as it was so colorful and it played with 3D perspective. In the picture appeared like a ball, but played with other ~~x~~ circles, shadows and sizes. When I saw it, I felt rare because I didn't know if the picture was moving or not, but obviously it ~~didn't~~ ^{wasn't} move ~~as~~ ^{it} was a picture, but it seemed...

This was only one of many great illusions about the perspective. I really recommend this exposition.

A MAGIC TRICK

Last week, I was walking in Seville with my friends when I saw a lot of people around a man.

The man was wearing a white suit with a cape drawn on it.

The man was talking with a woman, the woman was wearing a watch and while he was talking with her at the same time he caught the watch from her wrist and she didn't know! He stole her money and her necklace too and nobody saw it! This was incredible.

Then the magician ~~took~~ ^{took} back the things to the woman. And everybody were clapping ^{at} him.

AN ILLUSION :D

The ~~the~~ last week, I went to a fantastic magic show. It was my cousin's birthday. The magician was called Fernando, he performed 3 tricks, my favourite trick was the second. There was a woman with a black hat, and Fernando took out a white rabbit. This was only one of many great tricks, so I really recommend this show.
